

REQUEST FOR QUOTE

Regional R&D and Production Hub Network

Project ID: NVIDIA-REG-RD-2026-1106

Date of Issuance: June 11, 2026

Submission Deadline: June 26, 2026

1. PROJECT OVERVIEW

NVIDIA is soliciting proposals from qualified IT consultancy firms to design, procure, and implement a high-performance, secure network for our new regional R&D and Production Hub. The successful provider will act as the primary architectural partner, responsible for all facets of infrastructure branding, hardware selection, and security deployment.

2. TECHNICAL SCOPE OF REQUIREMENTS

The proposed network must support 48 high-performance workstations across five sectors. Design requirements include:

- **High-End Production Hardware:** Production workstations must be high-end, high-bandwidth machines optimized for multimedia production, software development, LLM training, and AI creation.
- **Edge Firewall:** Deploy a dedicated hardware firewall to secure the network perimeter.
- **Security Services:** Implement DNS server, DHCP server, and AAA service.
- **DMZ & Internal Defense:** Implement a DMZ concept through VLANs and Access Control Lists (ACLs) as a firewall alternative to protect sensitive assets.
- **Storage & Communication:** FTP storage server and robust ACLs to secure communication between departments and servers.
- **Network Sectors:**
 - Management/Secretariat: 5 workstations
 - Study: 8 workstations
 - Production: 10 high-end workstations
 - Support: 2 sectors (10 workstations each)
 - IT Department: 5 workstations

3. DELIVERABLES

- **Branding & Identity:** Development of a professional corporate identity.
- **Network Design:** Comprehensive technical topology including physical and logical layer mapping.
- **Security Documentation:** Detailed Access Control Matrix defining inter-departmental permissions.
- **Infrastructure Plan:** Bill of Materials (BOM) for all hardware, cabling, and gear.
- **Budgetary Projections:** Itemized cost analysis (CapEx) including hardware, software licensing, and labor, capped at 300,000 EUR.
- **Performance Testing Report:** Evidence of network throughput and security validation.

4. EVALUATION PANEL

All proposals will be reviewed by the following NVIDIA stakeholder panel:

- **Dr. Aris Thorne, CTO:** Technical architecture and scalability.
- **Sarah Jenkins, Procurement Director:** Budgetary compliance and terms.
- **Marcus Vane, Lead Security Architect:** ACLs, DMZ configuration, and mitigation.
- **Elena Rodriguez, Operations Manager:** Throughput and R&D/Production workflows.

5. SUBMISSION AND INQUIRIES

Interested firms must submit their technical proposal and budgetary breakdown by the deadline.

Official Point of Contact (POC) for Inquiries:

All technical and budget queries must be submitted in writing to:

Attn: Jay Park, Project Management Office (PMO)

Email: jay.park@becode.org

Note: To ensure fairness, all official clarifications provided by the PMO will be shared with all registered bidding firms.
