

RFP SCORING MATRIX

Presentation and PKT File Audit

Presentation Scoring Matrix

Category	Criteria	Score (1-5)
Technical Design	Adherence to hierarchical modularity, proper subnetting, and VLAN mapping.	4.5
Security Strategy	Effectiveness of DMZ, ACL placement, and internal segmentation.	5
Operational Plan	Clear inclusion of DNS, DHCP, AAA services, and throughput planning.	4.5
Budget & BOM	Reality of cost projections and adherence to the 300k EUR cap.	5
Professional Pitch	Clarity of branding, oral communication, and team cohesion.	3.5
Response to Q&A	Ability to justify technical choices and troubleshoot on the spot.	3

PKT File Audit Scoring Matrix

Assessment Criteria	What to Verify	Score (1-5)
Core Network Services	Verify DHCP assignment, DNS resolution, and AAA authentication success.	5
Security/DMZ Enforcement	Test ACLs: Does the DMZ/FTP server block unauthorized traffic as intended?	5
Printer Connectivity	Can workstations in different VLANs successfully send a print job to the assigned printer?	5
Web Server/HTTP (Extra)	Is the HTTP server reachable? Does index.html load correctly on client browsers?	4
Stability & Topology	No routing loops (STP stable), consistent IP addressing, and logical interface usage.	5

1 Inadequate: Did not meet the basic requirements of the RFQ.

2 Below Expectations: Major gaps in technical logic or security strategy.

3 Meets Expectations: Solid, professional, and meets all baseline technical requirements.

4 Exceeds Expectations: Clear, innovative, and demonstrates high technical competency.

5 Exceptional: Flawless execution; would be ready to implement immediately.
